Summary

AI/RAG-focused full-stack developer and BSc (Hons) Information Technology graduate from SLIIT (2026), with experience from an internship and project-based freelance work. Builds web apps with Vue.js, React, Next.js, Node.js, Express.js, and MongoDB has delivered REST APIs, an admin dashboard, and a client website, and integrated AI APIs (Gemini, OpenAI).

Experience

Full-Stack Developer Intern **Apr 2025 – Oct 2025**
Printcare Premedia Services Ltd *Colombo, Sri Lanka*

- Developed key features for the live Candela E-Learning Software (Tamil medium) and its usage monitoring system using Vue.js, Tailwind CSS, and RESTful APIs with Firebase (Firestore, Auth, Functions), including an admin dashboard with role-based access control (User, Admin, Super Admin), account activation/deactivation, and device management views.

Freelance Full-Stack Developer
Commercial Website – KFM Studio *Dattreo*

- Built secure Express.js REST APIs with robust auth and database workflows via Git/GitHub for KFM Studio, receiving direct commendation from the CEO for technical precision, professionalism, and dependable delivery.

Education

Sri Lanka Institute of Information Technology (SLIIT) **Colombo, Sri Lanka**
BSc (Hons) in Information Technology – Second Class (Lower Division) Honours, WGPA: 3.06 *2022 – 2026*
Certification: AWS Academy Cloud Web Application Builder (2025)

Technical Skills

- **Languages & Frontend:** JavaScript, TypeScript, Python, React.js, Next.js, Vue.js, Tailwind CSS
- **Backend & Databases:** Node.js, Express.js, Flask, REST API Design, MongoDB, MySQL, Nest.js, Supabase, Convex
- **AI & Tools:** Gemini API, OpenAI API, Git, GitHub, CI/CD, Docker, Agile
- **Testing:** Jest, Playwright, Supertest, Puppeteer (unit, API E2E and cross-user isolation tests)

Relevant Projects

DocuMind AI: Source-Grounded Document Q&A | *Next.js, NestJS, PostgreSQL, pgvector, Redis, BullMQ, Ollama* | GitHub

- Built a full-stack RAG app for querying PDFs with page-cited answers, using hybrid retrieval (pgvector + Postgres full-text, Reciprocal Rank Fusion) and local Ollama models with no paid APIs.
- Implemented async ingestion with Redis/BullMQ (status tracking, retries) and JWT auth with per-user document access control.
- Built an evaluation dashboard tracking Hit@K, MRR, citation-page accuracy, abstention accuracy and latency (p50 2.3s / p95 4.5s end to end on local models).

Emotional Story Assistive System (Final-Year) | *Python, PyTorch, Flask, React.js* | GitHub

- Co-architected a microservice platform for visually and hearing-impaired children covering emotion-based story recommendation, emotional text-to-speech, sign language translation, and stutter detection.
- Worked on the text-to-speech microservice (Coqui TTS, PyTorch) and REST APIs; containerized services with Docker.

MatchMyStuff | *Next.js, OpenAI API, Convex* | GitHub | Live Demo

- Built an AI-assisted lost-and-found matching platform at the Cursor 24-Hour Buildathon (3rd place, Convex Track).

CSE Stock Market Intelligence & Alert Bot | *Python, Gemini API, Asyncio* | GitHub

- Built a bot that collects daily CSE statistics, generates Gemini market summaries, and sends threshold-based alerts.
