Summary

BSc (Hons) Information Technology graduate from SLIIT (2026) with hands-on full-stack development experience from an internship and project-based freelance work. Builds web applications with Vue.js, React, Next.js, Node.js, Express.js, and MongoDB, and has delivered REST APIs, an admin dashboard, and a client-facing content management website. Has integrated AI APIs (Gemini, OpenAI) into several applications and works effectively in Agile teams using Git and code reviews.

Experience

Full-Stack Developer Intern **Apr 2025 – Oct 2025**
Printcare Premedia Services Ltd *Colombo, Sri Lanka*

- Developed key features for the live Candela E-Learning Software (Tamil medium) and its usage monitoring system using Vue.js, Tailwind CSS, and RESTful APIs with Firebase (Firestore, Auth, Functions), including an admin dashboard with role-based access control (User, Admin, Super Admin), account activation/deactivation, and device management views.

Freelance Full-Stack Developer
Commercial Website – KFM Studio *Dattreo*

- Built secure Express.js REST APIs with robust auth and database workflows via Git/GitHub for KFM Studio, receiving direct commendation from the CEO for technical precision, professionalism, and dependable delivery.

Education

Sri Lanka Institute of Information Technology (SLIIT) **Colombo, Sri Lanka**
BSc (Hons) in Information Technology – Second Class (Lower Division) Honours, WGPA: 3.06 *2022 – 2026*
Certification: AWS Academy Cloud Web Application Builder (2025)

Technical Skills

- **Languages & Frontend:** JavaScript, TypeScript, Python, React.js, Next.js, Vue.js, Tailwind CSS
- **Backend & Databases:** Node.js, Express.js, Flask, RESTful API Design, Microservices, MongoDB, MySQL, Firebase, Supabase, Convex
- **AI & Tools:** Gemini API, OpenAI API, Git, GitHub, CI/CD, Docker, Agile

Relevant Projects

Emotional Story Assistive System (Final-Year) | *Python, PyTorch, Flask, React.js* | GitHub

- Co-architected a microservice platform for visually and hearing-impaired children covering emotion-based story recommendation, emotional text-to-speech, sign language translation, and stutter detection.
- Worked on the text-to-speech microservice (Coqui TTS, PyTorch) and REST APIs, and containerized the services with Docker.

MatchMyStuff | *Next.js, OpenAI API, Convex* | GitHub | Live Demo

- Built an AI-assisted lost-and-found matching platform at the Cursor 24-Hour Buildathon (3rd place, Convex Track).

Quick Blog | *MERN Stack, Gemini AI* | GitHub | Live Demo

- Built a full-stack CMS with a Gemini-powered writing assistant and secure Node.js/Express CRUD APIs with validation and error handling.

CSE Stock Market Intelligence & Alert Bot | *Python, Gemini API, Asyncio* | GitHub

- Built a bot that collects daily Colombo Stock Exchange statistics, generates Gemini-based market summaries, and sends threshold-based alerts.
