SENTHEEPAN ELLANKOVAN

076 258 7540 | esentheepan@gmail.com | linkedin.com/in/ellankovan-sentheepan | github.com/Senthee1811
Kotahena, Colombo, Sri Lanka

BSc (Hons) Information Technology graduate from SLIIT with 9+ months of combined internship and freelance full-stack experience building scalable, AI-integrated web applications. Proficient in the MERN Stack (MongoDB, Express.js, Node.js, React.js), Next.js, and Python, with a strong foundation in RESTful API design, TypeScript, and microservices architectures. Demonstrated ability to ship production-quality code through internship, freelance, and academic environments.

- React.js / Next.js
- TypeScript / Python
- Tailwind CSS / Vue.js
- AI API Integration (Gemini, GPT-4)
- Node.js / Express.js
- RESTful API Design
- Git / GitHub / CI-CD
- Microservices Architecture
- MongoDB / MySQL
- Supabase / Convex
- Docker

EDUCATION | CERTIFICATIONS

BSc (Hons) in Information Technology | SLIIT, Colombo **2022 – 2026**

- Specialization: Information Technology (focus areas: Full-Stack Development & Software Quality Assurance)
- Second Class (Lower Division) Honours | WGPA: 3.06
- Relevant Coursework: Data Structures & Algorithms, OOP (Java/C++), Database Management Systems (SQL & NoSQL), Web Application Development, Agile Software Process.

Advanced Level (Physical Science Stream) | Jaffna Hindu College, Jaffna **2017 – 2021**

- Vice President, Interact Club: Led executive meetings and coordinated community initiatives, building leadership and stakeholder communication skills.

Certifications: AWS Academy Cloud Web Application Builder (2025)

PROFESSIONAL EXPERIENCE

PRINT CARE | Full-Stack Developer Intern **Apr 2025 – Oct 2025**

- Engineered and optimized RESTful APIs for the Candela E-Learning Platform, improving data reliability and reducing endpoint response times by an estimated 30–40%.
- Co-architected and deployed the Candela Usage Monitoring System, delivering real-time analytics on user engagement and platform health for a cross-functional development team.
- Built responsive, component-driven user interfaces using Vue.js and Tailwind CSS, improving UI modularity and accelerating feature delivery.

KFM STUDIO | Freelance Full-Stack Developer **Jan 2026 – Mar 2026**

- Designed and built studiokfm.com, a portfolio and content management website enabling the studio to showcase its work and manage content across multiple client projects from a single platform.
- Built secure RESTful backend APIs with Express.js, implementing authentication, authorization, and database operations for client-specific content management.
- Collaborated directly with stakeholders to gather requirements, define scope, and iterate on deliverables throughout the SDLC.

RELEVANT PROJECTS

MatchMyStuff – AI-Powered Lost & Found Platform *Next.js | OpenAI API | Convex*
GitHub | Live Demo

- Built an AI-powered lost-and-found platform that uses vector search to match lost-item reports with found-item listings, improving match accuracy and speed.
- Developed at the Cursor 24-Hour Buildathon, securing 3rd place in the Convex Track for a full-stack solution delivered under tight time constraints.

Emotional Story Assistive System for Visually/Hearing Impaired Children (Final-Year Project) *Python | Coqui TTS | PyTorch | FlaskAPI | React.js*
GitHub

- Architected a modular assistive platform using microservices, including live emotion detection for story recommendation, an emotional Text-to-Speech engine, sign language translation, and a stutter detection/remedial exercise engine.
- Engineered the emotional Text-to-Speech (TTS) microservice using Coqui TTS and PyTorch, fine-tuning neural acoustic models to dynamically modulate pitch, cadence, and expressive prosody.
- Designed high-throughput RESTful API endpoints and asynchronous worker pipelines for low-latency audio processing, containerizing all microservices with Docker for consistent environments.

CSE Stock Market Intelligence & Alert Bot *Python | Gemini 2.5 Flash-Lite API | Asyncio | Telegram/Discord API*
GitHub

- Engineered an automated market monitoring bot for the Colombo Stock Exchange (CSE) that aggregates daily trade statistics, price movements, and market index fluctuations.
- Integrated Google Gemini 2.5 Flash-Lite API with structured prompt engineering to generate concise, human-readable daily financial summaries.
- Implemented threshold-based alerting logic with state persistence to trigger real-time notifications on significant price and volume breakouts.

Quick Blog – AI-Assisted Content Management System *MERN Stack | Gemini AI*
GitHub | Live Demo

- Built a full-stack CMS with an AI writing assistant (Gemini AI) that generates long-form blog content from user-provided titles.
- Developed secure Node.js/Express REST APIs with full CRUD operations, input validation, and error handling, backed by a flexible MongoDB schema for dynamic content types and tags.
